## Call for Papers

abstract due January 30, 2015

# International Conference on

# & MATERIALS ENERGY

May 19-22, 2015  
Tetouan - Morocco

**ICOME**

## Contacts

ICOME'15 Secretary:

Fax: + 212 539 97 91 80

## Deadlines/Submission

One page extended abstract

Due **January 30, 2015**

By electronic submission to:

[icomaen15@gmail.com](mailto:icomaen15@gmail.com)

After a reviewing procedure, paper will be published on edited proceeding (CD).

High quality papers will be selected for international publication in several relevant journals, subject to review, in special (or regular) issues.

## Registration

Participation Fees include the Conference CD, attendance of all scientific sessions, lunches and coffee breaks **(before /later Apr 2015)**

Full delegates **295 € / 345 €**

Students **195 € / 245 €**

Industrial **370 € / 450 €**

*Special financial supports will be given under application (see website).*

## Objective

Energy and Materials are the master keys of the open challenge dominating our world and its future.

**ICOME'15** is a meeting dedicated to cutting edge research that addresses scientific needs of academic researchers, industrial and professionals to explore new horizons of knowledge on various topics in interlink between materials and energy applications fields. The conference will host a symposium dedicated to Energy & Materials for the city of the future.

**ICOME'15** is scheduled to include high quality contribution during presentation sessions, and also to engage participants in interesting discussion sessions.

Accepted abstracts followed by full paper submissions will be presented as oral or poster.

## Topics

Paper on all aspects coupling Energy and Materials both fundamentals and applied, will be welcome.

The main topics are :

- Recent developments on innovative materials
- Bio-ressources / wood/ energy
- Wind / Solar / Biomass / energy mix
- Transport in Porous Media
- Micro and Nano structured systems
- Heat and Mass transfer in building materials
- Double diffusive convective coupling
- Reactive Flow/materials and Combustion
- Phase change for energy storage
- Energy Systems / Energy efficiency
- Inverse Problems and optimization
- Computational Environmental Engineering
- Benchmarking and Validation
- Validation of computational methods
- Classical Heat and mass interlink problems

## Award:

**There will be  
a special Award  
Averroès Award (AA1)**
